DeepDrip™

TREE WATERING STAKES

Water and fertilize your trees at the roots, encouraging deeper roots and healthier trees with DeepDrip™ stakes. Water gets underground fast, so you can irrigate for shorter periods and save water. They also help aerate the soil, and you can add fertilizer into the shaft to direct nutrients to the root zone.

Four Lengths For All Plant Sizes: Use the 14.5" stake for shallow root trees and shrubs, like rose bushes and ornamental trees (or boxed trees). The 24.5" stake is best for most other tree varieties except for palms and similarly deeper rooted trees, which will benefit from the longer 36" stakes.

Built Smart - And Easy To Use: The DeepDrip's reinforced tip and cap are made from ABS and the upper shaft is made from Schedule 40 PVC. Multiple holes in the bottom half of the spike, internally covered by a mesh filter, allow water to flow out but keep dirt from getting in and clogging the tube. The UV-protected cap acts as a reinforced cover when pounding the stake into the ground, keeps debris from entering the shaft and holds a 1/4" drip line/emitter securely in place. By inserting a screwdriver through the two holes at the top of the upper shaft, stakes can be easily pulled up to remove/reposition, or rotated to deter root invasion.

ADD TO EXISTING TREES! Install DeepDrip™ stakes during or after tree planting for instant access to the root system for fertilizer delivery or to set up deep automatic drip watering.

The EXTENDER™

STOP DIGGING, AND START EXTENDING!

No more handle scraping on the turf - a simple solution for low quick coupler valves which cause key handles to hit the turf around the valve box. Extend our Quick Coupler Keys an extra 4" - Save time from having to dig up and raise the valve to make the key operational.

features

- No More Handle Scraping on Turf
- Extend Quick Coupler Keys 4" Higher
- Solid Brass with Sturdy Built-in Handle

The Claw™

QUICK COUPLER MOTION RESTRAINT

When quick coupler valves become unscrewed from swing joints, it's more than just a hassle - it can be dangerous. The Claw™, new from Underhill®, offers a simple solution. Embedded in the soil below the quick coupler, and then securely attached to its base, The Claw provides significant resistance to rotational, vertical and horizontal motion, preventing the valve from moving. Made from high strength ductile iron, this compact anchor attaches easily with a single steel bolt.

EASY RETROFIT!

Installs Without Removing Valve or Valve Box - Fits in 6" Round Box or Larger!

TurfSpy™

EARLY STRESS DETECTION GLASSES

Disease, drought and weed invasion are plant and turf killers. But by the time you see them it can be too late. TurfSpy™ glasses, with stress detection technology developed by NASA, lets you “see into the future” to identify problems 2-10 days before they are visible to your naked eye. Keep your turf and vegetation healthy BEFORE serious problems arise.

highly efficient spot watering saves time and labor costs

superior weed location and spraying saves time and money

features

- Shatterproof/polycarbonate stress detection lens (ANSI approved safety lens)
- Wrap-around lens limits ambient light for optimal detection
- Sports frame with adjustable ear piece
- Lightweight case included

HOW IT WORKS

Dying vegetation absorbs and reflects sunlight differently than when its healthy. The earliest signals occur at the outer limits of the human visual spectrum, and are rendered invisible compared to the predominant middle wavelengths.

TurfSpy™ filters the light in the center so that fringe spectra, which show early plant stress, become visible.

Tracker™ 2

PORTABLE IRRIGATION MACHINE

The **Tracker™ 2** offers an economical solution for supplementing seasonal watering needs of ¼ acre to 2 acre areas. It's also ideal for irrigating athletic fields, cemeteries, golf course roughs, or other large areas where an underground system is impractical. Built to last with precision German engineering and high quality materials, this portable powerhouse can irrigate an entire football field in just two passes.

Tracker™ 2 requires minimal labor to operate. Powered by water, it pulls itself along a steel cable, dragging up to 325 ft. of 1" reinforced heavy-duty hose (sold separately). Each pass irrigates about 2/3 acre per 8 hours of operations.

features

- Standard full / part circle sprinkler (11-13 GPM)
- 52 - 56 ft. radius
- Automatic shut-off at end of pass
- Water turbine drive and gear box
- 328 ft. steel cable
- Steel anchor stake
- Includes 1" brass Quick-Connect adapter
- Optional speed controller available

Precision German engineering and high quality components built to last!

specifications

- Weight: 81 lbs.
- Size: Length 33" Width 18", Height 22"
- Materials: Aluminum, Brass, ABS
- Minimum Operating Water Pressure: 50 psi
- Hose Required: 1"

TURF TESTING

18" Easy Reach Soil Sampler with Ball Mark Tool Part # TSP-SS18

DESIGNED FOR SMALL CORE SOIL SAMPLES, FAST SIMPLE AND ACCURATE.

- Perfect for greens
- Includes built in ball mark tool to close hole after pulling core
- Pulls 7/16" core up to 10" deep
- Comfortable Easy Reach grip

Soil Profiler / Shovel Type Sampler

Part # TSP-8x4

OUR ROBUST SOIL SAMPLER SLIGHTLY TAPERED TO GIVE A CLEAN CUT WITH MINIMAL TURF DISTURBANCE.

- Blade half is easily removed for examination of the soil profile, root depth & density.
- Produces a large flat sample 8" x 4"
- Plug can be replaced with minimum surface disturbance

Soil Sampler 2" Part # TSP-SS

ADJUSTABLE DEPTH GAUGE ALLOWS SOIL SAMPLER TO DOUBLE AS 2" PLUNGER REPAIR. BEST OPTION FOR USE ON SAND PROFILE AREAS OR ANY FINE TURF.

- Designed for use on well watered golf greens
- Open side barrel for easy inspection of soil structure
- Tee handle and hand grips for ease of use
- Hardened steel blade

Soil Probe Part # TSP-12

THE PERFECT TOOL WHERE DEEP SOIL SAMPLING IS REQUIRED. DESIGNED TO PENETRATE HARD SOIL.

- Open side 12" barrel for deep soil penetration and easy inspection of soil structure
- 12" extension bar
- Tee handle and hand grips for ease of use
- Hardened steel leading edge for optimum results

TURF REPAIR

Turf Doctor - Square Turf Repair 6" & 9"

PART # TTD-6 PART # TTD-9

THE IDEAL TOOL FOR FAST AND EXACT TURF SQUARE CUT AND REFIT. COMPLETE REPAIR CAN BE MADE WITH NO GAPS LEFT BETWEEN THE TURF.

- True surface level is maintained
- Plugs fit uniformly in every square hole
- Minimum root loss and quick turf recovery
- Zinc coded aluminum material, made to last

Round Plugger - Turf Repair/Soil Sampler 4" & 6"

Part # TRP-4 Part # TRP-6

FOOT OPERATED AND SPRING LOADED EJECTOR FOR QUICK TURF PLUG REMOVAL. IDEAL FOR EXTRACTING DISEASE SAMPLES AND REPAIRING DAMAGED TURF.

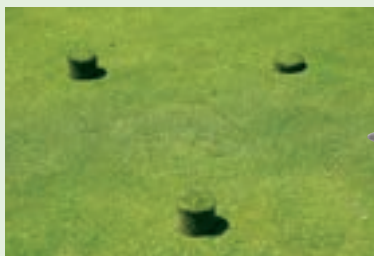

- Variable depth adjustment 1" - 4"
- Available in 4" & 6" round models
- 4" models ideal for extracting disease samples and turf repair
- 6" model great for damaged turf repair
- Thin blade is heat treated and zinc plated for clean cut

Round Plugger - Turf Repair/Soil Sampler 2"

Part # TRP-2

HAND PUSH OPERATED TURF PLUGGER/SAMPLER COLLECTS PLUGS IN TUBE STEM. IDEAL FOR SOIL SAMPLING AND DIVOT REPAIR ON GOLF GREENS.

- Variable depth adjustment ¼" - 4"
- Each plug is pushed up into tube as next plug is taken
- Plugger is zinc plated body and heat treated steel blade
- Solid steel construction for long life

3 Tine Aerator Part # T3TA-3

THE IDEAL TOOL FOR AERATING SMALL AREAS DUE TO COMPOSITION OR ADDING WATER PERCOLATION WHERE SOILS BECOME REPELLENT.

- Three ½" hollow tines
- Side-Eject hollow tines to prevent clogging
- Formed steel flat bar base with tubular "T" handle
- The choice of turf professionals for decades

Keeps Green Surface Firm and Playable

Tournament-Ready®

100% ACTIVE Ingredient

PREMIUM PENETRANT SOIL SURFACTANT

No Need to Water Until Evening Irrigation Cycles

**45 Years of Research and Development in Pioneering
The Most Cost Efficient & Effective Option On The Market**

What Makes Tournament-Ready® So Special?

3 Key Components utilizing Smart Surfactant Technology™

Component #1: Quick wetting penetration of soils, plus moves water out of water saturated soils.

How does it do it? Immediately relieves LDS and wets the soil profile where most competitive products will not wet the soil immediately and efficiently.

Component #2: Moves excess water out and keeps doing it.

How does it do it? Tournament-Ready will reduce the surface tension and attraction of water molecules to each other, making water "spread and infiltrate". The effect will increase the downward movement of excess water out of the root zone while decreasing the upward movement of capillary water in the soil. This will remove excess water from the 12" zone of a USGA or California style green.

Component #3: Holds water in the right place where it should.

How does it do it? Relieves LDS in thatch that won't wet, but will not leave thatch permanently wet. It will dry down like any part of the green, but allow water to continue to re-wet the area when Tournament-Ready is in use.

Note: Tournament-Ready does not require watering in and is non-phytotoxic but to achieve the results mentioned above, it is recommended to water in the product following application.

H2O Maximizer™ LIQUID

NONIONIC SOIL SURFACTANT, POLYMER RESIN BLEND

- Unique soil surfactant and polymer resin blend that can be tank mixed for spray application or injected directly into irrigation flow
- Surfactant ingredients provide initial soil wetting action while polymer resin adsorbs to soil particles for enhanced water retention
- Reduced watering requirements are achieved through surfactant's reduction of surface tension combined with polymer resin's attachment to soil particles for greater water holding capacity to guard against plant stress
- Polymer resin boosts water retention in soil to deliver enhanced residual activity

Water FX™

DRY WATER CONDITIONER / ACIDIFYING AGENT ADJUVANT

- Water FX effectively sequesters hard water minerals such as calcium, magnesium and iron that can interfere with many pesticide active ingredients
- Water FX lowers spray water pH to ensure full effectiveness of many insecticides, fungicides and herbicide sprays that perform better in moderately acidic water
- Certain pesticide active ingredients will be more effective and are more readily available to the plant with the use of Water FX
